DHH Announces Changes to Behavioral Health Services

Medicaid recipients began receiving letters earlier this week regarding enrollment in Bayou Health for behavioral health services. Many individuals and families receiving home and community-based waiver services were confused by the letter they received. The Department of Health and Hospitals (DHH) issued a flyer to help clear up the confusion. Read the flyer [here](#).

Medicaid recipients are advised NOT to throw the letter away. This is a big decision and should not be made quickly. Individuals with developmental disabilities and families are advised not to enroll until enough information is received to make an informed decision.
