Workforce considerations

OAAS is aware of nationwide labor and workforce difficulties. In an effort to encourage entrance into the home and community based services workforce and retaining those already working in it, OAAS has utilized American Rescue Plan Act funds to assist.

- Beginning in 2024 and continuing into 2025, OAAS has launched a pilot program for direct service workers to receive training. Direct service workers can sign up for an online learning platform and participate in self-directed learning through November 30, 2025.
- In 2024 and 2025, OAAS offered Person Center Thinking (PCT) training and dementia training at no cost to direct service workers.
 - PCT training helps develop basic person centered thinking skills that is focused on changing perspectives from simply care for people to working in partnership with the person as they identify their personal goals and what quality of life means to them.
 - Dementia training will include effective evidence based Alzheimer’s interventions, including boosting early detection and diagnosis, reducing risk and preventing avoidable hospitalizations and emergency department visits. Providing dementia training to direct service workers will give them better insight into the disease and elevate their ability to serve those with these diagnoses.
- Beginning in 2024 and continuing into 2025, OAAS in conjunction with Louisiana Medicaid and OCDD will be conducting a rate analysis. This will allow LDH to expand and enhance the current cost reporting and rate setting activities for HCBS providers.
- In 2024, OAAS conducted a Support Coordination gap analysis statewide, part of which was to review workforce strain.
- In 2023, bonus payments were made to direct support workers and support coordinators. To be eligible for the bonus, a person must have worked from April 2021 to October 2022 without any break in employment. Bonus payments of \$300 per month were paid to the provider, of which \$250 went directly to the direct service worker.
